

FIG. 1

Figure 1: Dimensions of the test pattern. The diagram shows a 15mm x 15mm test area divided into a 5x5 grid of 25 squares. The columns are labeled with pitches: 10um, 20um, 50um, 100um, 150um, and 200um. The rows are labeled with densities: 0%, 30%, 50%, 70%, and 90%. Each square contains a specific pattern of lines and text. The top row shows a 1.5mm pitch and 0% density. The second row shows a 3mm pitch and 0% density. The third row shows a 1.5mm pitch and 0% density. The fourth row shows a 3mm pitch and 0% density. The fifth row shows a 1.5mm pitch and 0% density. The bottom row shows a 1.5mm pitch and 0% density. The right side of the diagram shows a 15mm dimension. The bottom of the diagram shows a 15mm dimension. The left side of the diagram shows a 2.5mm dimension. The right side of the diagram shows a 3mm dimension.
